

## **UN Millennium Campaign Policy demands on aid quantity, aid effectiveness and trade and agriculture**

1. To establish national action plans and binding timetables with incremental annual growth rates clearly showing how to reach the agreed 0.7% of GNI as ODA;
2. To agree on a new collective interim target of at least 0.63% of GNI as ODA by 2012;
3. To agree on EU accountability mechanisms on ODA commitments by establishing a system of peer reviews;
4. To ensure that innovative financing mechanisms and resources to fight climate change are additional to existing ODA commitments;
5. To fight aid fragmentation through a better division of labour, thus focusing bilateral assistance on few sectors and fewer partner countries;
6. To establish binding timetables and measurable indicators to monitor progress on aid effectiveness;
7. Reform the EU Common Agricultural Policy so it no longer prevents poor producers from lifting themselves out of poverty;
8. Increase export opportunities of developing countries through a simplified and expanded "Everything But Arms" initiative;
9. Lead the process for a successful and pro-poor conclusion of the Doha trade negotiations.
